

Impact XP and Impact

- ✓ No Mixing!
- ✓ No Pouring!
- ✓ No Mess!

Ready to Use

This line marking paint is the most advanced, ready-to-use line marking paint. No mixing and no pouring of the paint is required as the paint is applied direct from its bag or container without the addition of any water.

Impact XP

Environmentally friendly paint for playing fields and sports courts. The paint is developed for the iGO machines and can be applied with cone as well as flat fan nozzles. **It allows you to over-mark a standard sized football pitch from as little as one litre of paint.** For sports club quality 1.5 litre of paint is used. The paint is titanium dioxide based and is 100% biodegradable!

Impact

This paint is developed for the iGO and can also be used in other machines as well. With Impact, it is possible to over mark a football pitch from 1.5 litre of paint using a red cone nozzle.

Paint	Initial Mark (litre)	Over Mark (litre)
Impact	From 3.0	From 1.5
Impact XP	From 1.5	From 1.1

Can over mark
4 pitches
with 1 bag!

Can over mark a standard football pitch from 1.1 litre per pitch.

Impact XP liquid paint now comes in a unique easily disposable 5 litre plastic bag. This has a sealable spout, enabling the paint to be applied directly from the container. After use - put on the lid and use again and again. When empty, the bag can be simply disposed of with standard waste.

The formulation offers a high level of water resistance. It can be applied on wet grass - even in light rain!

Under normal weather condition (dry) the paint will dry in 20 minutes.
